Fixed family choices evaluated on 2023
Every configuration and the strongest baseline were selected on 2022.
RRC gain over the selected baseline: 0.817%; required: at least 1%.

2023 normalized MSE; lower is better
Required primary score ≤ 0.99
Selected random-walk baseline = 1
Equal weights: 5 series × 2 seeds × 3 horizons. No IID market confidence interval.
Old-target is a sanity control only. The full advancement gate fails.
